AUTHOR INDEX VOLUME 4 (1985/1986)

The issue number is given in front of the page numbers

Ahuja, R.K., Minimax linear programming problem (3) 131–134
Amaya, J., On the convergence of curvilinear search algorithms in unconstrained optimization (1) 31– 34
Arkin, E.M. and C.H. Papadimitriou, On negative cycles in mixed graphs (3) 113–116
Assad, A.A. and W. Xu, On lower bounds for a class of quadratic 0, 1 programs (4) 175–180
Baccelli, F. and K.S. Trivedi, A single server queue in a hard-real-time environment (4) 161–168
Bagchi, U., J.K. Ord and R.S. Sullivan, Parameter estimation for convolutions and compound distributions (6) 301–308
Barcia, P., The bound improving sequence algorithm (1) 27– 30
Berg, M. and M.J.M. Posner, On the regulation of queues (5) 221–224
Bhaskaran, S., *see* S. Sethi (2) 61– 64
Bulfin, R.L., *see*, C.Y. Liu (2) 71– 74
Chandru, V., C.R. Coullard and D.K. Wagner, On the complexity of recognizing a class of generalized networks (2) 75– 78
Chang, M.D., *see* M. Enquist (4) 151–155
Colbourn, C.J., J.M. Keil and L.K. Stewart, Finding minimum dominating cycles in permutation graphs (1) 13– 17
Coullard, C.R., *see* V. Chandru (2) 75– 78
Dearing, P.M., Location problems (2) 95– 98
Enquist, M. and M.D. Chang, New labeling procedures for the basis graph in generalized networks (4) 151–155
Erenguc, S.S., An algorithm for solving a structured class of linear programming problems (6) 293–299
Faigle, U. and R. Schrader, A setup heuristic for interval orders (4) 185–188
Fuhrmann, S.W., Symmetric queues served in cyclic order (3) 139–144
Glazer, A. and R. Hassin, Stable priority purchasing in queues (6) 285–288
Glynn, P.W., Regenerative structure of Markov chains simulated via common random numbers (2) 49– 53
Gonçalves, A.S., Duality for nonconvex absolute value programming and a characterization of linear max-min programs (2) 91– 93
Grimmett, G.R. and W.R. Pulleyblank, Random near-regular graphs and the node packing problem (4) 169–174
Grove, M.A., Upper bounds for the risk in the α–t utility function (4) 193–195
Hassin, R., *see* A. Glazer (6) 285–288
Haurie, A., *see* P. L'Écuyer (2) 85– 90
Hearns, D.W., S. Lawphongpanich and J.A. Ventura, Finiteness in restricted simplicial decomposition (3) 125–130
Hollander, A., *see* P. L'Écuyer (2) 85– 90
Hwang, F.K., A linear time algorithm for full Steiner trees (5) 235–237
Keil, J.M., *see* C.J. Colbourn (1) 13– 17
Kelton, W.D., Replication splitting and variance for simulating discrete-parameter stochastic processes (6) 275–279
Khan, A.M. and C.-T. Shih, On country risk: Some preliminary results (3) 135–138
Koop, G.J., Cyclic scheduling of offweekends (6) 259–263
Lavalle, I.H., On information-augmented chance-constrained programs (5) 225–230
Lavalle, I.H., On the 'Bayesability' of chance-constrained programming problems (6) 281–283
Lawphongpanich, S., *see* D.W. Hearns (3) 125–130
L'Écuyer, P., A. Haurie and A. Hollander, Optimal research and development expenditures under an incremental tax incentive scheme (2) 85– 90
Liu, C.Y. and R.L. Bulfin, On the complexity of preemptive open-shop scheduling problems (2) 71– 74
